DIRECTIONS FOR ORDERING

Customers should observe the following rules when ordering goods:

Always specify WIDTH first then LENGTH or HEIGHT second, then THICKNESS.

Measurements given in inches are understood to be GLASS sizes.

Measurements given in feet and inches are understood to be OUTSIDE sizes.

The term SASH implies only one piece to fill opening.

The term WINDOW implies two pieces (upper and lower Sash).

Orders for Windows should state the number of lights in the window (glass size of same, thickness of sash and whether **check** or **plain** rail. All windows are glazed with single strength glass unless specified to the contrary. If double strength glass is required, same should be specified. Windows or sash not listed, extra price. Special orders should specify size of opening to be filled. Weights shown in this catalogue are for shipping purposes, and include crating.

Orders for Doors should state width, height, thickness, number of panels and kind of wood. Refer to designs by numbers. If design is taken from any other catalogue, state from whose book, and the date of issue.

Orders for Frames. All frames listed in this catalogue are shipped K.D. Orders for **special** frame should be specified as follows:

Window Frames. State whether for frame or brick building, with or without pulleys, together with width of jamb required.

Outside Door Frames. State whether for frame or brick building, width and thickness of jamb, also thickness of doors to be used.

Inside Door Frames. State width and thickness of jambs, thickness of doors to be used, and whether made with rabbet or stop.

Orders for Mouldings should give plainly the number of the moulding. If special moulding, give exact detail or sketch.

CARE OF VENEERED DOORS

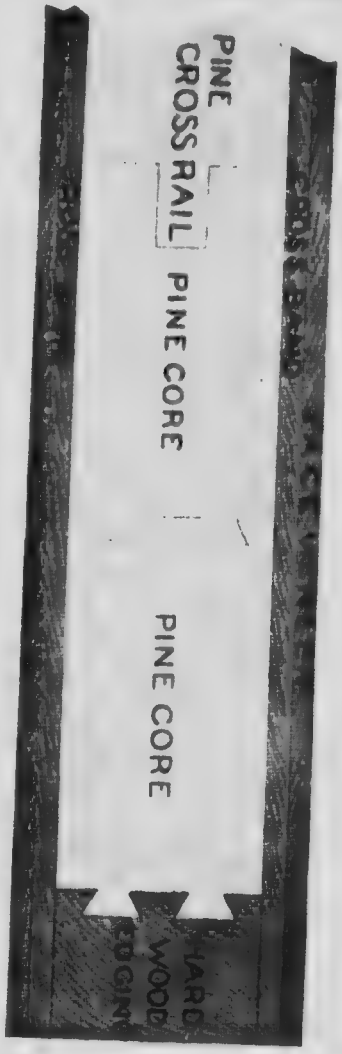
Veneered Doors being made of thoroughly kiln-dried material will, if exposed to the weather, absorb any moisture in the atmosphere, as doors are shipped as a rule in the white. If shipped local freight, we cover the doors with paper and crate them (see note on page 34). This is sufficient to protect them under ordinary conditions until they reach destination. If, before you take delivery of the doors, you find that they have been damaged by exposure or rough handling, have your local freight agent make notation of such damage on the expense bill, which you will require in order to secure claim from railway.

When taken from crate, a coat of filler or stain should be applied at once. Oak, which is a porous wood, should have a coat of filler, but birch should be given a coat of shellac unless it is to be stained, in which case apply stain first.

Do not put veneered doors in building until the walls and plaster are thoroughly dry.

Veneered doors as outside doors will last for years if they have been properly treated by the finisher, but should further be protected by porch or verandah. The top and bottom should be painted with at least one coat of thick paint.

Construction of Our XLCR Five-Ply Perfe
Frame Veneer Doors



A section cut of our Slab Door
Showing dovetail joints, double veneers and hardwood edgestrips

Crating Veneered Doors

Veneered Panel Doors, when shipped local freight, are wrapped with heavy paper and crated, three doors to a crate. This guards against damage in transit, and for which we charge per crate fifty cents.

We manufacture Mirrors from the best polished plate glass.

XLCR SCREENS FOR HALF WINDOWS

Sizes in stock:

⅞-inch thick.

in.	in.	in.
10 x 20, four light	20 x 24, two light	24 x 24, two light
12 x 20, four light	20 x 26, two light	24 x 26, two light
12 x 24, four light	20 x 28, two light	24 x 28, two light
12 x 26, four light	20 x 30, two light	24 x 30, two light
12 x 28, four light	22 x 24, two light	26 x 28, two light
14 x 28, four light	22 x 26, two light	26 x 30, two light
16 x 20, two light	22 x 28, two light	28 x 30, two light
18 x 20, two light	22 x 30, two light	30 x 30, two light
20 x 20, two light		

Price, each $1.00

By using our factory-made screens you will have a screen that will outwear many times the ordinary adjustable screen. They are made to fit against check rail on window, making them insect-proof. They come one dozen to a crate, which weighs approximately 50 lbs.

FULL SIZE WINDOW SCREENS

Sizes in stock:

in.	in.	in.
10 x 20, four light	18 x 20, two light	24 x 26, two light
12 x 20, four light	20 x 20, two light	24 x 28, two light
12 x 24, four light	20 x 24, two light	24 x 30, two light
16 x 20, two light	24 x 24, two light	26 x 28, two light

Price, each $1.75

For genuine satisfaction we recommend the full sized screen. They can be put on in the same manner as storm sash and do not interfere with the use of either part of the window. One dozen to crate, weighing about 100 lbs.

See Pages 16-17 for interior view of Art Glass Department.

BUILDERS' SUPPLIES

We carry a full line of Builders' Supplies, and can make prompt shipment on any of the following:

BUILDING PAPER

Plain and Tarred.

ROOFING

"The Standard of Quality."

"Outlasts tin and iron."

Carried in one, two and three ply.

FEDERAL ELASTIC CEMENT

Weather-proof. Water-proof. Wear-proof

Produces an absolutely permanent, indestructible patch. Used for repairing old and leaky roofs, sealing cracks in cistern and basement walls, repairing skylights, and a dozen and one other uses.

Put up and sold in 25 pound pails.

NATIONAL CEMENT FILLER

Makes ordinary cement floors water-proof and dust proof. Is not affected by oils and acids.

Write us for prices and descriptive matter on the above lines.

CEMENT, LIME AND PLASTER

Get our prices for mixed cars and local shipments.

Our estimating department is at your service. Submit architects' plans and specifications for complete quotations.

BEAVER BOARD

Builds beautiful interiors at moderate cost.

Send for Booklets describing advantages.

BEAVER BOARD

PURE WOOD FIBRE

TRADE MARK

The following table of sizes carried in stock will be found convenient:

48-inches Widths

Length in feet	6 in.	7 in.	8 in.	9 in.	10 in.	12 in.
Sq. ft. in panel	24	28	32	36	40	48
Panels in bundle	12	11	10	10	10	10
Sq. ft. in bundle	288	308	320	360	400	480
Weight per bdle. in lbs.	144	154	160	180	200	240

Special prices on orders of 5,000 feet and over.

BEAVER BOARD STRIP

3/8 x 1 3/4 Fir .....$2.00 per 100 lineal ft.
3/8 x 2 1/4 Fir ..... 3.00 per 100 lineal ft.

Approximately 600 lineal feet of strip required for each 1,000 square feet of Beaver Board.

Get your Bevelling and Silvering done by expert workmen.
See Pages 16 and 17.

VALUABLE POINTERS FOR BUILDERS

This table gives you the amount of lumber required, figuring ordinary percentage for waste and allowing for loss in matching.

TO FIND QUANTITIES OF LUMBER REQUIRED

Studding, when laid on 16-inch centres. Estimate one to the lineal foot. This allows for doubling at openings and at corners.

Joists and Rafters, when laid on 16-inch centres. To three-quarters of the length of the building add 1. Thus: for a building 22 x 36, take three-quarters of the 36 - 27—add it to this amount, making 28. This extra joist or rafter being required for one side. For each bearing partition add one or two pieces.

Roof Sheathing Laid Solid—To full area of roof add 10 per cent. for waste. If laid 2 inches apart, three-quarters of above will be required.

ARTICLE	Count Width	Face Width	Loss in Matching	To area to be covered, add
Shiplap	12 inch	11¼	7 %	1-12
Shiplap	10 inch	9¼	8 1-3%	1-10
Shiplap	8 inch	7¼	11 %	1- 8
Shiplap	6 inch	5¼	12½%	1- 5
Flooring and Siding	6 inch	5¼	12½%	1- 5
Flooring Partition, Ceiling	4 inch	3¼	19 %	1- 4
Flooring	3 inch	2¼	25 %	1- 3

ARTICLE	Size	Exposed	To area to be covered, add
Siding, bevelled	½ x 4	3¼ inch	1- 4
Siding, bevelled	½ x 4	3 inch	1- 3
Siding, bevelled	½ x 4	2¾ inch	1- 2
Siding, bevelled	½ x 6	5 inch	9-40
Siding, bevelled	½ x 6	4¾ inch	1- 4

Shingles—

When exposed 4 inches to the weather, require 9 to the sq. ft. Add 1-10 for waste.

When exposed 4½ inches to the weather, require 8 to the sq. ft. Add 1-10 for waste.

When exposed 5 inches to the weather, require 7 1-15 to the sq. ft. Add 1-10 for waste.

Cornices—Multiply the total lineal feet by the combined width of planceer, frieze and fascia. Thus: if the planceer is 12 inches, the frieze 8 inches, and the fascia 4 inches, the combined width is 24 inches, or 2 feet b.m to the lineal foot of cornice.

Corner Boards and Outside Base—Estimate on same plan as cornice and then add a quarter if of 1¼, or half if of 1½ material.

Bridging—Multiply the total lineal feet, measuring each string in a straight line, by the following:

For 2 x 6, 2 x 8, or	2 x 10 on	16 inch centres	by 2	
" 2 x 12	" 16	"	"	" 2¼
" 2 x 14	" 16	"	"	" 2½
" 2 x 6 and 2 x 8	" 12	"	"	" 2
" 2 x 10 and 2 x 12	" 12	"	"	" 2¼
" 2 x 14	" 12	"	"	" 2 2/3

Length of Rafters to be used on the roof elevation:

¼ pitch, take	7-12	of the width of the building				
1-3 "	" 3- 5	"	"	"	"	
⅜ "	" 5- 8	"	"	"	"	
½ "	" 7-10	"	"	"	"	
⅝ "	" 4- 5	"	"	"	"	
Full "	" 1⅛	"	"	"	"	

VALUABLE POINTERS FOR BUILDERS

(Continued)

To the above lengths must be added the amount of projection at the eaves. You will find that a third and a half pitch are most commonly used.

Add also to make stock lengths. For length of rafter on one-way roofs, take the rafter given for double the width. Thus: the rafter for a one-way roof on a building 10 feet wide, 4th pitch, is that given for 20 feet wide, or 11 feet 2 inches. In area of gable above given no allowance is made for waste or laps. To verify above or obtain length of rafters for buildings of other widths than above given, multiply the width of building by .559 for 4th pitch; 6 for 3rd pitch, and by .71 for half pitch.

Capacity, in bushels, of cribs or bins, each 8 feet high in the clear:

Width						Width				
3	8	10	12	14	Length	16	18	22	26	30

How large a bin shall I build to hold 800 bushels? This is a very common question, and to answer it and similar ones instantly is the object of above table. Thus: how long a bin 8 feet wide and 8 feet high is required to hold 800 bushels of wheat?

Run down the 8-foot column until 823 (the nearest amount to 800 bushels) is reached, and opposite, in the centre column, headed "length" is 16, the length required.

NAILS REQUIRED

Nails (wire) to the 1,000 feet.

1,000 ft. B.M. framing ..	10	lbs. 20D.	No. in. lb.	35.	Length	3⅝ in.
1,000 ft. B.M. framing ..	14	lbs. 10D.	"	87.	"	3 in.
1,000 ft. B.M. 1 in. bds. .	25	lbs. 10D.	"	87.	"	3 in.
1,000 ft. B.M. ½ in. sgd	18	lbs. 6D.	"	350.	"	2 in.
1,000 ft. shingles	3½	lbs. 4D.	"	492.	"	1⅜ in.
1,000 ft. ⅞ finishing	30	lbs. 8D.	"	196.	"	2½ in.
1,000 ft. 1¼ finishing ...	40	lbs. 10D.	"	137.	"	3 in.
1,000 ft. flg.	35	lbs. 10D.	"	137.	"	3 in.
1,000 ft. lath	6½	lbs. 3D.	"	720.	"	1¼ in.
1,000 ft. sheathing lath .	30	lbs. 10D.	"	87.	"	3 in.

For cut nails add one-third

PAINT REQUIRED

Paint required to cover 100 square yards.

Priming, 20 lbs. white lead and 4 gallons linseed oil.
Two Coat Work—40 lbs. white lead and 8 gallons linseed oil.
Three Coat Work—50 lbs. white lead and 12 gallons linseed oil.

Three Coat Work
- ½ pint shellac for knotting.
- 1 lb. putty.
- 3 or 4 lbs. color pigment.
- 4½ gallons mixed paint.

VALUABLE POINTERS FOR BUILDERS

(Continued)

BRICK REQUIRED

In Chimneys to the Foot in Height

Size of Chimney	Size of Flue	No. of Brick Ft. in height
16 x 16	8 x 8	30
20 x 20	12 x 12	40
16 x 24	8 x 16	40
20 x 24	12 x 16	45
20 x 28	two flues, each 8x8, brick lined	75
24 x 10	three flues, each 8x12, brick lined	112

In Walls to the Surface Foot

Thickness of Walls	No. Brick to Surface Ft
4	7½
8	15
12	22½
16	30
20	37½
24	45

Brick run from 20 to 22 to the cubic foot.

One bushel of cement and 2 bushels of sand will cover 3½ square yards 1 inch thick, 4½ square yards ¾ inch thick, and 6¾ square yards ½ inch thick.

One bushel of cement and 1 bushel of sand will cover 2¼ square yards 1 inch thick, 3 square yards ¾ inch thick, and 4¼ square yards ½ inch thick.

One thousand lath will cover 70 yards of surface, and 11 pounds of lath nails will nail them on; 8 bushels of good lime, 16 bushels of sand and 1 bushel of hair will make enough good mortar to plaster 100 square yards.

A cord of stone, 3 bushels of lime ,and a cubic yard of sand will lay 100 cubic feet of wall.

FINISH OF HARDWOOD DOORS

Filling—Open grain woods require a paste filler, and this should be applied **after** the staining, if a stain is desired. The filler should be rubbed into the pores of the wood thoroughly and allowed twenty-four hours at least to dry after which the surface should be thoroughly sandpapered. It is then ready for the first coat of varnish. When stain is used in connection with filler, the shade of filler is usually the same as the stain, unless a contrast is desired for special effect.

Exterior Finishing—For outside doors a high grade of exterior varnish should always be used; two coats will give good results. **Do not use shellac** as a prim'ng coat, but app'y the varnish directly to the surface of the wood, and when thoroughly dry, sandpaper with 000 flint paper, the second or final coat should be left in the gloss.

A varnished surface should not be exposed directly to the weather as water will ruin the surface.

Interior Finish—For **interior doors** apply a coat of thin shellac to the natural or stained surface of the door and when dry, sand with 00 flint paper. Apply first coat of interior gloss varnish, allow to dry thoroughly, then sand with 000 flint paper. Apply second coat of same varnish and let dry. If third coat of varnish is desired, sand first with 000 flint paper.

Rubbed Finish—For rubbed finish or interior doors, use **interior** rubbing varnish. Proceed the same as for gloss finish, rubbing the last coat when **thoroughly dry** with pumice stone and rubbing oil to an egg shell gloss.

For rubbed finish on exterior doors, proceed the same as for interior doors, but use a good grade of exterior varnish.

XLCR BRAND

CUSHING BROS LIMITED

Undertakers' Supplies

At our Calgary Plant we have established a

CASKET DEPARTMENT

and carry a full line of the Latest Designs in Caskets, Casket Hardware, Robes, Linings, etc.

These goods are XLCR quality.

Wired orders promptly executed.

XLCR BRAND

Our Box Factory at Saskatoon is equipped with the latest and best machinery in this line of business and your requirements can be promptly filled.
